Office Action Summary	Application No. 10/517,608	Applicant(s) MINE, TOSHIHIRO	
	Examiner Robert D. Harlan	Art Unit 1713	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/20/2007 has been entered.

2. The Amendment filed by Applicant on 06/20/2007 has been entered.

3. The rejection of claims 1, 3, 5 and 7-12 under 35 U.S.C. 102(b) as being anticipated by Hentges et al., WO 95/12623 is withdrawn.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1713

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 1, 3, 5 and 7-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hentges et al., WO 95/12623. Hentges teaches a hydrogenated hydrocarbon resin suitable as tackifier where in the resin has a softening point of from 40 to 120°C. First, Hentges discloses a broad softening point range that covers both hydrogenated and non-hydrogenated ranges of the present claims. Hentges indirectly teaches the softening point range for the non-hydrogenated resins when the softening point range for the hydrogenated range is disclosed. Second, dicyclopentadiene is used in one instance as a chain transfer

Art Unit: 1713

agent. However, in performing as a chain transfer agent it also acts as a monomer. The present invention differs Hentges in the amount of dicyclopentadiene in the copolymer. The Examiner contends one of ordinary skill in the would be motivated to add more dicyclopentadiene because adding more dicyclopentadiene would result in a lower softening point.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert D. Harlan whose telephone number is (571) 272-1102. The examiner can normally be reached on Mon-Fri, 10 AM - 8 PM.

8. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David W. Wu can be reached on (571) 273-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

9. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through

Art Unit: 1713

Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>.
